---

# Preface

---

This report provides a statistical profile of each of Ontario's Provincial Electoral Districts, using data from Statistics Canada's June 1991 Census of Population.

The full set of profiles will be of use to the leaders of the political parties, the media, and various academic researchers. To minimize costs, a relatively small number of these reports have been produced.

The report contains a set of census definitions. Pursuant to the licensing agreement with Statistics Canada, technical questions about definitions and methodology should be directed to the Ontario Ministry of Finance at (416) 325-0916.

# Provincial Electoral Districts

## PROVINCE OF ONTARIO

Algoma	Muskoka-Georgian Bay

20 Percent Sample Data

## EDUCATION STATUS

Highest Level of Schooling	Number	Percent
Less than grade 9	14,310	24.2
Grades 9-13		
Without certificate	13,770	23.3
With certificate	9,335	15.8
Trades certificate/diploma and other non-university	11,840	20.0
University without degree/certificate	7,645	12.9
University degree/certificate	7,110	12.0
Population 15 years and over	59,220	100.0

## IMMIGRATION

	Number	Percent
Canadian-born population	32,610	45.2
Born in Ontario	27,360	37.9
Foreign-born population	36,720	50.9
Non-permanent residents	2,810	3.9
Total population	72,140	100.0

## LABOUR FORCE

By Occupation	Male	Female
All occupations	22,020	17,645
Managerial, admin., etc.	1,920	1,525
Natural sciences, etc.	1,035	295
Social sciences & related	135	400
Religion	20	15
Teaching and related	410	600
Medicine and health	165	810
Artistic, literary & recreation	275	250
Clerical and related	2,500	6,255
Sales	1,785	1,610
Service	2,715	2,520
Farming, Horticulture, etc.	180	15
Fishing, trapping & related	0	0
Forestry and logging	20	0
Mining and quarrying	0	0
Processing	605	350
Machining and related	1,110	195
Product fabricating, etc.	2,600	1,720
Construction trades	3,245	105
Transportation equipment	1,180	120
Material handling & related	640	325
Other crafts & equip. oper.	295	85
Occupations n.e.c.	1,175	455

## CLASS OF WORKER

	Male	Female
	Percent	Percent
Employees	92.9	97.3
Self-employed (incorporated)	3.2	0.9
Self-employed (unincorporated)	3.8	1.6
Unpaid family workers	0.1	0.2
Total	100.0	100.0

## PRIVATE HOUSEHOLDS

By Income Level	Number	Percent
Under \$10,000	2,050	8.3
\$10,000-19,999	3,425	13.8
\$20,000-29,999	3,580	14.5
\$30,000-39,999	3,540	14.3
\$40,000-49,999	3,230	13.0
\$50,000-59,999	2,555	10.3
\$60,000-69,999	1,960	7.9
\$70,000 and over	4,415	17.8
Total	24,760	100.0
Average household income	\$46,549	

## OFFICIAL LANGUAGE

	Number	Percent
English only	62,850	87.1
French only	150	0.2
Both English and French	3,935	5.5
Neither English nor French	5,205	7.2

## MOBILITY

Between 1986-1991	Number	Percent
Did not move	39,675	59.2
Moved	27,310	40.8
Within same municipality	11,230	16.8
From another municipality	5,230	7.8
From different province	2,100	3.1
From outside Canada	8,750	13.1
Population 5 years & over in 1991	66,985	100.0

## LABOUR FORCE

By Industry	Number	Percent
All industries	39,665	100.0
Agricultural and related	65	0.2
Fishing and trapping	0	0.0
Logging and forestry	10	0.0
Mining, quarrying, etc.	25	0.1
Manufacturing	8,780	22.1
Construction, etc.	3,985	10.0
Transportation and storage	1,345	3.4
Communication	1,040	2.6
Wholesale trade	1,980	5.0
Retail trade	5,830	14.7
Finance and insurance	1,890	4.8
Real estate and insurance	680	1.7
Business service	2,295	5.8
Government service	2,725	6.9
Education service	2,215	5.6
Health and social service	2,155	5.4
Accomm., food & beverage	2,235	5.6
Other service	2,420	6.1

## DWELLINGS

Period of Construction	Number	Percent
Before 1946	645	2.6
1946-1960	6,620	26.7
1961-1970	11,250	45.4
1971-1980	4,635	18.7
1981-1985	1,170	4.7
1986-1991	430	1.7
Total	24,760	100.0
Average value of dwelling	\$243,988	

## INDIVIDUALS WITH INCOME

By Income Level	Male	Female
Under \$10,000	5,450	8,255
\$10,000-24,999	8,835	11,205
\$25,000-39,999	8,180	4,675
\$40,000-49,999	2,660	775
\$50,000 and over	2,220	395
Total 15 years & over	27,335	25,310
Average income	\$26,876	\$16,861

## Definitions

The definitions of geographic terms and census concepts are presented here in summary form only. Users should refer to the **1991 Census Dictionary** (Catalogue No. 92-301E) for the full definitions and additional remarks related to these concepts and definitions.

### Age

Refers to the age at last birthday (as of the census reference date, June 4, 1991). This variable is derived from the date of birth question which asks day, month and year of birth. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

### Census Division (CD)

Refers to the general term applying to geographic areas established by provincial law, which are intermediate geographic areas between the census subdivision and the province (e.g., divisions, counties, regional districts, regional municipalities and seven other types of geographic areas made up of groups of census subdivisions).

In Newfoundland, Manitoba, Saskatchewan and Alberta, provincial law does not provide for these administrative geographic areas. Therefore, census divisions have been created by Statistics Canada in co-operation with these provinces.

### Census Family

Refers to a now-married couple (with or without never-married sons and/or daughters of either or both spouses), a couple living common-law (again with or without never-married sons and/or daughters of either or both partners), or a lone parent of any marital status, with at least one never-married son or daughter living in the same dwelling.

### Census Family Composition

Refers to the classification of census families according to the number and/or age groups of never-married sons and/or daughters at home.

### Census Family Living Arrangements

Refers to the classification of persons in terms of whether they are members of a family household or a non-family household, and whether they are family or non-family persons.

### Census Family Status

Refers to the classification of the population according to whether or not they are members of a census family.

**Family persons** refers to household members who belong to a census family. They, in turn, are further classified as follows:

**Husband and wife** refer to persons of opposite sex who are legally married to each other and living in the same dwelling.

**Common-law partners** are two persons of opposite sex who are not legally married to each other but live together as husband and wife in the same dwelling.

**Lone parent** refers to a mother or a father, with no spouse or common-law partner present, living in a dwelling with one or more never-married sons and/or daughters.

**Never-married sons and/or daughters** refers to blood, step- or adopted sons and daughters who have never married (regardless of age) and are living in the same dwelling as their parent(s). Sons and daughters who are currently or were previously married, or who are living common-law, are not considered to be members of their parent(s)' census family even if they are living in the same dwelling. In addition, those never-married sons and daughters who do not live in the same dwelling as their parent(s) are not considered members of their parent(s)' census family. In previous censuses, the term "child (children)" was used to refer to never-married sons and/or daughters, regardless of age.

**Non-family persons** refers to household members who do not belong to a census family. They may be related to Person 1 (the household reference person) (e.g., Person 1's divorced brother, brother-in-law, cousin, grandparent) or **unrelated** (e.g., lodger, room-mate, employee). A person living alone is always a non-family person.

### Census Family Structure

Refers to the classification of census families into families of now-married couples (with or without never-married sons or daughters living at home of either or both spouses), families of common-law couples (with or without never-married sons or daughters living at home of either or both partners) and lone-parent families by sex of parent.

### Census Subdivision (CSD)

Refers to the general term applying to municipalities (as determined by provincial legislation) or their equivalent, e.g., Indian reserves, Indian settlements and unorganized territories.

In Newfoundland, Nova Scotia and British Columbia, the term also describes geographic areas that have been created by Statistics Canada in co-operation with the provinces as equivalents for municipalities.

### Census Subdivision Type

The type indicates the municipal status of a census subdivision. Census subdivisions (CSDs) are classified into various types, according to official designations adopted by provincial or federal authorities.

The following list indicates the abbreviations used for CSD types:

BOR	Borough
C	City - Cité
CM	County (municipality)
COM	Community

CT	Canton (municipalité de)
CU	Cantons unis (municipalité de)
DM	District municipality
HAM	Hamlet
ID	Improvement district
IGD	Indian government district
LGD	Local government district
LOT	Township and royalty
MD	Municipal district
NH	Northern hamlet
NV	Northern village
P	Paroisse (municipalité de)
PAR	Parish
R	Indian reserve - Réserve indienne
RM	Rural municipality
RV	Resort village
SA	Special area
SCM	Subdivision of county municipality
SD	Sans désignation (municipalité)
S-E	Indian settlement - Établissement indien
SET	Settlement
SRD	Subdivision of regional district
SUN	Subdivision of unorganized
SV	Summer village
T	Town
TP	Township
TR	Terres réservées
UNO	Unorganized - Non organisé
V	Ville
VC	Village cri
VK	Village naskapi
VL	Village
VN	Village nordique

### Economic Family

Refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption.

### Economic Family Status

Refers to the classification of the population according to whether or not they are members of an economic family.

Economic family persons refers to two or more household members who are related to each other by blood, marriage, common-law or adoption and thereby constitute an economic family.

Unattached individuals refers to household members who are not members of an economic family. A person living alone is always an unattached individual.

### Household

Refers to a person or group of persons (other than foreign residents), who occupy the same dwelling and do not have a usual place of residence elsewhere in Canada. It may consist of a family group (census family) with or without other non-family persons, of two or more families sharing a dwelling, of a group of unrelated persons, or of one person living alone. Household members who are temporarily absent on Census Day (e.g., temporary residents elsewhere) are considered as part of their usual household. For census purposes, every person is a member of one and only one household.

Households are classified into three groups: private households, collective households and households outside Canada.

### Household Size

Refers to the number of persons in a private household.

### Household Type

Refers to the basic division of private households into family and non-family households. Family household refers to a household that contains at least one census family, that is a married couple with or without never-married sons or daughters, or a couple living common-law with or without never-married sons or daughters, or a lone parent living with one or more never-married sons or daughters (single-parent family). One-family household refers to a single census family (with or without other non-family persons) that occupies a private dwelling. Multiple-family household refers to one in which two or more census families (with or without additional non-family persons) occupy the same private dwelling.

Non-family household refers to either one person living alone in a private dwelling or to a group of two or more people who share a private dwelling, but who do not constitute a census family.

### Indian Reserve

Refers to land, the legal title to which is vested in Her Majesty, that has been set apart for the use and benefit of an Indian band and that is subject to the terms of the Indian Act. Since it is generally excluded from local jurisdiction and is administered by the Federal Department of Indian and Northern Affairs Canada (INAC), it is classified as a census subdivision (CSD) by Statistics Canada.

### Indian Settlement

Refers to places, identified by the Federal Department of Indian and Northern Affairs Canada (INAC) for statistical purposes only, where a self-contained group of at least 10 Indian people

reside more or less permanently. Indian settlements are usually located on Crown lands under federal or provincial jurisdiction. They have not been set apart for the use and benefit of an Indian band as is the case with Indian reserves.

## **Land Area**

### **Net**

Refers to land area measurement in square kilometres and excludes discernible bodies of water as found on the maps used to calculate land area.

All land area measurements apply to the limits in effect on January 1, 1991, the geographic reference date for the 1991 Census of Canada.

The map scales used to measure land area generally vary between 1:50,000 and 1:250,000. In densely populated urban areas and in sparsely populated areas, larger or smaller scales are sometimes used.

## **Marital Status (Legal)**

Refers to the conjugal status of a person.

### **Legally married (and not separated)**

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained.

### **Legally married and separated**

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce.

### **Divorced**

Persons who have obtained a legal divorce and who have not remarried.

### **Widowed**

Persons who have lost their spouse through death and who have not remarried.

### **Never married (single)**

Persons who have never married (including all persons less than 15 years of age) and persons whose marriage has been annulled and who have not remarried.

## **Mother Tongue**

Refers to the first language learned at home in childhood and still understood by the individual at the time of the census.

The following instructions were provided to respondents in the 1991 Census Guide:

Report the first language learned at home before starting school. If this language is no longer understood, report the second language learned.

If more than one language is understood, report the language first learned at home. If two languages were learned at the same time, report the language spoken most

often as a child at home. If both languages were used equally often, report both.

For a child who has not yet learned a language, report the first language this child will learn at home. If two languages will be learned at the same time, report the one which will be used most often to speak to this child. If both languages are used equally often, report both.

If a person speaks an Indian language (from India), do not report Indian but rather the specific language such as Hindi, Urdu or Punjabi.

If a person speaks an Amerindian (North American Indian) language, report the specific Amerindian language such as Cree or Ojibway.

## **Occupied Private Dwelling**

Refers to a private dwelling in which a person or group of persons are permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. These data, however, exclude private dwellings occupied solely by foreign and/or temporary residents.

### **Private Dwelling**

Refers to a separate set of living quarters with a private entrance either from outside or from a common hall, lobby, vestibule or stairway inside the building. The entrance to the dwelling must be one which can be used without passing through the living quarters of someone else. The dwelling must meet the three conditions necessary for year-round use:

- (1) a source of heat or power (as evidenced by chimneys, power lines, oil or gas pipes or meters, generators, woodpiles, electric lights, solar heating panels, etc.);
- (2) access to a source of drinking water throughout the year (as evidenced by faucets, drain pipes, wells, water pumps, etc.);
- (3) an enclosed space that provides shelter from the elements (as evidenced by complete and enclosed walls, by a roof, and by doors and windows that provide protection from wind, rain and snow).

### **Private Household**

Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

### **Province**

Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified.

### **Sex**

Refers to the gender of the respondent.

## Structural Type of Dwelling

Refers to the structural characteristics and/or dwelling configuration, that is, whether the dwelling is a detached single house, apartment in a high-rise building, a row house, a mobile home, etc.

## Tenure

Refers to whether some member of the household owns or rents the dwelling, or whether the dwelling is band housing (on an Indian reserve or settlement).

## Territory

Refers to two major political divisions of Canada, namely Yukon Territory and Northwest Territories. From a statistical point of view, these territories are equivalent to provinces, i.e. a basic unit for which data are tabulated and cross-classified.

## Data Quality

### General

The 1991 Census was a large and complex undertaking and, while considerable effort was taken to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. Users of census data should be aware such error exists, and have some appreciation of its main components, so that they can assess the usefulness of census data for their purposes and the risks involved in basing conclusions or decisions on these data.

Errors can arise at virtually every stage of the census process from the preparation of materials, through the listing of dwellings and data collection to processing. Some errors occur more or less at random, and when the individual responses are aggregated for a sufficiently large group, such errors tend to cancel out. For errors of this nature, the larger the group, the more accurate the corresponding estimate. It is for this reason that users are advised to be cautious when using small estimates. There are some errors, however, which might occur more systematically, and which result in "biased" estimates. Because the bias from such errors is persistent no matter how large the group for which responses are aggregated, and because bias is particularly difficult to measure, systematic errors are a more serious problem for most data users than the random errors referred to previously.

For census data in general, the principal types of error are as follows:

- **coverage errors**, which occur when dwellings and/or individuals are missed, incorrectly included or double counted;
- **non-response errors**, which result when responses cannot be obtained from a small number of households and/or individuals, because of extended absence or some other reason;

- **response errors**, which occur when the respondent, or sometimes the Census Representative, misunderstands a census question, and records an incorrect response;
- **processing errors**, which can occur at various steps including: **coding**, when "write-in" responses are transformed into numerical codes; **data capture**, when responses are transferred from the census questionnaire to computer tapes by key-entry operators; and **imputation** when a "valid", but not necessarily correct, response is inserted into a record by the computer to replace missing or "invalid" data ("valid" and "invalid" referring to whether or not the response is consistent with other information on the record);
- **sampling errors**, which apply only to the supplementary questions on the "long form" asked of a one-fifth sample of households, and which arise from the fact that the results for these questions, when weighted up to represent the whole population, inevitably differ somewhat from the results which would have been obtained if these questions had been asked of all households.

The above types of error each have both random and systematic components. Usually, however, the systematic component of sampling error is very small in relation to its random component. For the other non-sampling errors, both random and systematic components may be significant.

### Coverage Errors

Coverage errors affect the accuracy of the census counts, that is the sizes of the various census universes: population, families, households and dwellings. While steps have been taken to correct certain identifiable errors, the final counts are still subject to some degree of error resulting from persons or dwellings being missed, incorrectly included in the census or double counted.

Missed dwellings or persons result in **undercoverage**. Dwellings can be missed because of misunderstanding of enumeration area (EA) boundaries, or because dwellings are hidden or appear uninhabitable. Persons can be missed when their dwelling is missed or classified as vacant, or when individual household members are omitted from the questionnaire because the respondent misinterprets the instructions on whom to include. Some individuals may be missed because they have no usual residence and did not spend census night in any dwelling.

Dwellings or persons that are incorrectly included or double counted result in **overcoverage**. Overcoverage of dwellings can occur when structures unfit for habitation are listed as dwellings, or when units which do not meet the census definition of a dwelling are listed separately instead of being treated as part of a larger dwelling. Double counting of dwellings can occur, for example, because of ambiguity over EA boundaries. Persons can be double counted because their dwelling is double counted or because the guidelines on whom to include on the questionnaire have been misunderstood. Occasionally, someone who is not in the census population universe, such as a foreign resident or a fictitious person, may, incorrectly, be enumerated in the census. On average, overcoverage is less

likely to occur than undercoverage and, as a result, counts of dwellings and persons are likely to be slightly underestimated.

In 1991, four studies were undertaken to measure different aspects of coverage error. First, a sample of dwellings listed as vacant was revisited to verify that they really were vacant on Census Day. Adjustments have been made to the final census counts for households and persons missed because their dwelling was incorrectly classified as vacant. Second, a sample of persons enumerated as temporary residents was selected to verify whether or not they were enumerated at their usual place of residence. Based on this sample, estimates were obtained of the number of persons missed because they were temporarily absent from their usual place of residence. Corresponding adjustments were made to the final population counts. Despite these adjustments, the final counts are still subject to some undercoverage. For Canada as a whole and for each province and territory, the magnitude of this residual undercoverage in the 1991 Census is being measured by means of a special study known as the Reverse Record Check. Undercoverage tends to be higher for certain segments of the population such as young adult males and recent immigrants. The fourth study, known as the Overcoverage Study, is designed to investigate overcoverage errors. The results of the Reverse Record Check and the Overcoverage Study, when taken together, furnish an estimate of net undercoverage.

## Other Non-Sampling Errors

While coverage errors affect the number of units in the various census universes, other errors affect the characteristics of those units.

Sometimes, it is not possible to obtain a complete response from a household, even though the dwelling was identified as occupied and a questionnaire dropped off. The household members may have been away throughout the census period or, in rare instances, the householder may have refused to complete the form. More frequently, the questionnaire is returned but information is missing for some questions or individuals. Considerable effort is devoted to ensure as complete a response as possible. Census representatives edit the questionnaires and follow up on missing information. The Census Representative's work is then checked by both a supervisor and a quality control technician. Despite this, at the end of the collection stage, a small number of responses is still missing. Although missing entries are eliminated during processing by replacing a missing value by the corresponding entry for a "similar" record, there remain some potential **non-response errors**. This is particularly serious if the non-respondents differ in some respects from the respondents, since this procedure will result in non-response bias.

Even when a response is obtained, it may not be entirely accurate. The respondent may have misinterpreted the question or may have guessed the answer, especially when answering on behalf of another, possibly absent, household member. Such errors are referred to as **response errors**. While response errors usually arise from inaccurate information provided by respondents, they can also result from mistakes by the Census Representative when completing certain parts of the questionnaire, such as structural type of dwelling, or when calling back to obtain a missing response.

Some of the questions on the census document require a written response. During processing, these "write-in" entries are given a numeric code. **Coding errors** can occur, especially when the code list is extensive (as with, for example, language, ethnic origin, industry and occupation), and when the written response is ambiguous, incomplete or difficult to read. Coding errors are controlled, though not completely eliminated, by verifying a sample of the codes and taking corrective action where necessary. For the first time in 1991, much of the coding was automated, partly in an effort to reduce the extent of coding errors.

The information on the questionnaires is key-entered onto a computer file. Two procedures are used to control the number of **data capture errors**. First, certain edits (such as range checks) are performed as the data are keyed. Second, a sample from each batch of documents is re-keyed and compared with the original entries. If there is more than a specified number of errors among the original entries, the whole batch is re-keyed.

Once the data have been captured, they are sent to Ottawa where they undergo a series of computer checks to identify missing or inconsistent responses. In the case of inconsistent responses, it has first to be decided which response is to be considered invalid. Invalid or missing responses must then be replaced by valid responses, that is, responses which are consistent with other data on the record. For a small proportion of cases, the correct response can be inferred from other data on the record. In most cases, however, this is not possible and a valid response is obtained from a "donor" record selected at random from among a group of consistent records which are similar to the invalid record in terms of a number of related characteristics. There is, of course, no guarantee that the imputed value will necessarily be the correct response for the individual concerned. However, provided the missing or invalid records are similar, on average, to the valid records, any **imputation errors** will more or less cancel out when results are tabulated for a sufficiently large geographic area or population subgroup.

Various studies are being carried out to evaluate the quality of the responses obtained in the 1991 Census. For each question, response rates and edit failure rates have been calculated. These can be useful in identifying the potential for non-response and other errors. Also, tabulations from the 1991 Census have been or will be compared with corresponding estimates from previous censuses, from sample surveys (such as the Labour Force Survey) and from various administrative records (such as birth registrations and municipal assessment records). Such comparisons can indicate potential quality problems or at least discrepancies between the sources.

In addition to these aggregate-level comparisons, there are some micromatch studies in progress, in which census responses are compared with another source of information at the individual record level. For certain "stable" characteristics (such as age, sex, mother tongue, place of birth), the responses obtained in the 1991 Census, for a sample of individuals, are being compared with those for the same individuals in the 1986 Census. Also, following the 1991 Census, a sample of persons was re-enumerated, primarily to determine overcoverage rates. At the same time, however, interviewers asked a series of detailed questions on language, ethnic origin and marital status;

the responses will be compared with the corresponding census responses in order to identify, and hopefully understand, response errors.

## Confidentiality and Random Rounding

The figures shown in the tables have been subjected to a confidentiality procedure known as "random rounding". This is done to prevent the possibility of associating statistical data with any identifiable individual. Under this method, all figures including totals are randomly rounded either up or down to a multiple of "5", and in some cases "10". While providing strong protection against disclosure, this technique does not add significant error to the census data. However, there are some consequences for the users. Since totals are independently rounded, they do not necessarily equal the sum of individually rounded figures in distributions. Also, minor differences can be expected in corresponding totals and cell values in various census tabulations. Similarly, percentages, which are calculated on rounded figures, do not necessarily add up to 100. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data. It should also be noted that small cell counts may suffer a significant distortion as a result of random rounding. Individual data cells containing small numbers may lose their precision as a result.

Users should be aware of possible data distortions when they are aggregating these rounded data. Imprecisions as a result of rounding tend to cancel each other out when data cells are reaggregated. However, users can minimize these distortions by using, whenever possible, the appropriate subtotals when aggregating.

For those requiring maximum precision, the option exists to use custom tabulations. With custom products, aggregation is done using individual census database records. Random rounding occurs only after the data cells have been aggregated, thus minimizing any distortion.

In addition to random rounding, **area suppression** has been adopted to further protect the confidentiality of individual responses.

**Area suppression** results in the deletion of all characteristic data for geographic areas with populations below a specified size. The extent to which data are suppressed depends upon the following factors:

- if the data are tabulated from the 100% database, suppression is based upon the total population;
- if the data are tabulated from the 20% sample database, suppression is based upon the non-institutional population;
- if the data contain an income distribution, those areas with populations below 250 persons are suppressed;
- if the data **do not** contain an income distribution, those areas with a population of less than 40 persons are suppressed.

In all cases, suppressed data are included in the appropriate higher aggregate subtotals and totals.

This technique is being implemented for all products involving subprovincial data (i.e. Profile series, basic summary tabulations, semi-custom and custom data products) collected on a 100% or 20% sample basis.

## Special Notes

### Population Counts Based on Usual Residence

The population counts shown here for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians staying in a dwelling in that area on Census Day and having no usual place of residence elsewhere in Canada, as well as those considered "non-permanent residents" (see note on this group). In most areas, there is little difference between the number of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in the area at any particular time could significantly exceed the number of usual residents shown here.

### Non-permanent Residents

In 1991, for the first time, the census of population included both permanent and non-permanent residents of Canada. Non-permanent residents are persons who hold student or employment authorizations, Minister's permits or who are refugee claimants.

Prior to 1991, only permanent residents of Canada were included in the census. (The only exception to this was 1941.) Non-permanent residents were considered foreign residents and were not enumerated.

Today in Canada, non-permanent residents make up a growing segment of the population. Their presence can affect the demand for such government services as health care, schooling, employment programs and language training. The inclusion of non-permanent residents in the 1991 Census will also facilitate comparisons with provincial and territorial statistics (marriages, divorces, births and deaths) which include this population. In addition, the census definition is now closer to the United Nations' recommendation that long-term residents (persons living in a country for one year or longer) be enumerated.

Total population counts, as well as counts for all variables collected on a 100% basis, e.g., age, sex, mother tongue and marital status, will be affected by the change in the 1991 Census universe. Until immigration data are released, it will not be possible to know the extent to which differences in the counts are due to the inclusion of non-permanent residents or other factors. Users should be especially careful when comparing data from 1991 and previous censuses in geographic areas where there is a concentration of non-permanent residents. These include the major metropolitan areas in Ontario, Quebec and British Columbia.

Although every attempt has been made to enumerate non-permanent residents, factors such as language difficulty and the reluctance to complete a government form or

understand the need to participate may affect the enumeration of this population. Non-permanent residents can only be identified through the long questionnaire completed by 20% of Canadian households. An estimate of the size of this population group will not be known until the release of census data on immigration in December 1992.

## Incompletely Enumerated Indian Reserves and Indian Settlements

On some Indian reserves and Indian settlements in the 1991 Census, enumeration was not permitted, or was interrupted before it could be completed. Moreover, some Indian reserves and Indian settlements were enumerated late or the quality of the collected data was considered inadequate. These geographic areas (a total of 78) are called incompletely enumerated Indian reserves and Indian settlements.

Data for 1991 are therefore not available for the incompletely enumerated reserves and settlements and are not included in tabulations. Data for geographic areas containing one or more of these reserves and settlements are therefore noted accordingly. Because of the missing data, users are cautioned that for the affected geographic areas, comparisons (e.g., percentage change) between 1986 and 1991 are not exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can be significant for smaller areas, where the affected reserves and settlements account for a higher proportion of the population.

A list of incompletely enumerated Indian reserves and Indian settlements along with Population and Occupied Private Dwelling Counts from the last two censuses (where available) has been compiled and is shown in Appendix 1.

## Comparability and Quality of Data on Mother Tongue

The mother tongue question reads as follows for the 1991 Census: "What is the language that this person first learned at home in childhood and still understands?" This phrasing is similar to that used for the 1986 Census, except for the insertion of the expression "at home". Furthermore, an instruction has been added in 1991 following the question: "If this person no longer understands the first language learned, indicate the second language learned". In 1986, this instruction was found in the guide which accompanied the questionnaire.

The short questionnaire (Form 2A) contains only one language question; the one on mother tongue. In 1991, it bore the title of **Language First Learned at Home in Childhood**. However, the long questionnaire (Form 2B) comprised four language-related questions. The title **Language** preceded these questions. The question on the mother tongue came last, following the two questions on the knowledge of official and non-official languages, and the question on language spoken most often at home. In 1986, the question on mother tongue (Question 6) preceded questions on the language spoken most often at home and on knowledge of the official languages (Questions 18 and 19).

In 1991, the boxes corresponding to the three most frequent non-official languages were deleted from the questionnaire. The only two check boxes were the ones referring to English and French; other language responses were recorded by means of a write-in answer space. For the first time, in 1991, these answers were coded using an automatic process.

An important change was made to the "Algonquian languages, n.i.e." category. This category contains the Oji-Cree language in 1991, which had been assigned to Cree or Ojibway in 1986.

The table shown below gives the main answer categories of the question on mother tongue. The complete data (100%), the data taken from the short questionnaire (distributed to 80% of households) and the data taken from the long questionnaire (distributed to 20% of households) are included. Some of the following figures are approximative.

	1981			1986			1991		
	100%	80%	20%	100%	80%	20%	100%	80%	20%
Total	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0
Single response	97.5	97.5	97.8	96.2	96.1	96.6	97.3	97.0	98.8
English	60.3	60.3	60.4	60.6	60.6	60.6	60.5	60.6	59.9
French	25.2	25.2	25.2	24.3	24.3	24.3	23.8	23.8	24.1
Non official languages	12.1	12.0	12.2	11.3	11.2	11.6	13.0	12.6	14.8
Multiple responses	2.5	2.5	2.2	3.8	3.9	3.4	2.7	3.0	1.2

The 1991 distributions show the notable difference between the data taken from the short form (80%) and the data taken from the long form (20%). The proportion of multiple responses was 3.0% and 1.2% respectively. This difference is probably due to the fact that in the first case, the question on the mother tongue was the only language question asked, while in the second case, other language questions were asked before the question on the mother tongue. Respondents would be less likely to report two or more mother tongues if they were first able to indicate their language proficiency. Accordingly, there was a higher proportion of single responses in the responses taken from the long form (20%); this increase applied to French and especially to non-official languages, while a decrease was noted for English. Part of this variation is probably linked to the inclusion of the new question on the knowledge of non-official languages.

Between 1981 and 1991, fluctuations were observed in the proportion of multiple responses on the short form (80%). This proportion rose from 2.5% to 3.9% between 1981 and 1986, and dropped back to 3.0% in 1991. These fluctuations are probably due to the modifications made to the questionnaire.

Time comparisons become a rather delicate issue due to the changes in certain aspects of the collection and processing of data on mother tongue from one census to the next. Therefore, users are advised to exercise caution when analysing historical trends.

## Structural Type of Dwelling

Movable dwellings, one category of structural type of dwellings, were suspected to be under-reported in the 1991 Census. This is thought to be due to the misclassification of a number of Mobile Homes as other structural types. For large geographic areas, this error is not expected to have a significant impact upon other dwelling categories because of the relatively large number of dwellings in that area. However, for small geographic areas, the impact may be more pronounced.

## Data Quality Index for Census Subdivisions and Enumeration Areas

In general, the census has been able to obtain accurate population and dwelling counts and to maintain high response rates to census questions for all geographic areas in Canada. However, some census subdivisions (CSDs), mostly Indian reserves and Indian settlements, have registered very high non-response rates for some census questions despite the fact that accurate population and dwelling counts were obtained.

A data quality index based on a global non-response rate is given for some CSDs and enumeration areas (EAs) to reflect this situation. The global non-response rate used for this data quality index,  $T$ , is the percentage of required responses left unanswered by the respondents. Only census questions for publication purposes are used in the calculation of the global non-response rate. The data quality index is expressed by a symbol indicating an interval for  $T$ :

◆:  $5\% \leq T < 25\%$ ;

◆◆:  $T \geq 25\%$ .

CSDs and EAs with no data quality index shown have a global non-response rate lower than 5%. Tabulations on CSDs and EAs for which the data quality index is ◆ are to be used with caution. Only population and dwelling counts are released for the CSDs and EAs for which the data quality index is ◆◆. This non-response is a very localized phenomenon; hence census data other than population and dwelling counts are included in all higher geographic level tabulations. Tabulations for geographic areas containing one or more of these census subdivisions or enumeration areas are not subject to any particular note.

## Census Subdivision Data

In a few cases, errors have been found in the 1991 counts for certain census subdivisions. Due to operational constraints, it was not possible to make adjustments to the 1991 Census data shown in the tables for these individual areas. Data for the following census subdivisions are known to be in error at the time of printing. For these areas, the original and revised population and dwelling counts are shown.

## Newfoundland

### Division No.1, Subd. V, SUN, Newfoundland

1991 total population reads	180
should read	3
1991 private occupied dwellings read	47
should read	2

### Trepassey, T, Newfoundland

1991 total population reads	1,198
should read	1,375
1991 private occupied dwellings read	338
should read	383

## New Brunswick

### Dufferin, PAR, New Brunswick

1991 total population reads	861
should read	480
1991 private occupied dwellings read	310
should read	179

### Saint Stephen, PAR, New Brunswick

1991 total population reads	1,437
should read	1,818
1991 private occupied dwellings read	494
should read	625

## Citizenship

Refers to the legal citizenship status of the respondent. Persons who are citizens of more than one country were instructed to indicate this fact.

## Class of Worker

This variable classifies persons who reported a job into those who (i) worked mainly for someone else for wages, salaries, commissions or payments "in kind", (ii) worked without pay in a family farm, business or professional practice owned or operated by a related household member, (iii) worked mainly for themselves, with or without paid help. The job reported was the one held in the week prior to enumeration if the person was employed, or the job of longest duration since January 1, 1990, if the person was not employed during the reference week. Persons with two or more jobs in the reference week were to provide information for the job at which they worked the most hours.

**Note:** Self-employed persons in incorporated companies in 1971 and 1981 Census publications are normally included in the paid worker category to permit comparisons with surveys of establishments and the System of National Accounts. In 1991 and 1986 Census publications, where space permits, self-employed persons whose farms or businesses were incorporated are shown separately.

## Condition of Dwelling

Refers to whether, in the judgement of the respondent, the dwelling requires any repairs (excluding desirable remodelling or additions).

**Regular maintenance** refers to painting, furnace cleaning, etc. **Minor repairs** refer to missing or loose floor tiles, bricks or shingles, defective steps, railing or siding, etc. **Major repairs** refer to defective plumbing or electrical wiring, structural repairs to walls, floors or ceilings, etc.

## Economic Family

Refers to a group of two or more persons who live in the same dwelling and are related to each other by blood, marriage, common-law or adoption.

## Employed

Refers to persons who, during the week prior to June 4, 1991:

- (a) did any work at all excluding housework or other maintenance or repairs around the home and volunteer work; or
- (b) were absent from their job or business because of own temporary illness or disability, vacation, labour dispute at their place of work, or were absent for other reasons.

Data are available for persons 15 years of age and over, excluding institutional residents.

## Ethnic origin

Refers to the ethnic or cultural group(s) to which the respondent's ancestors belong. Ethnic or cultural origin refers to the ethnic "roots" or ancestral background of the population, and should not be confused with citizenship or nationality.

It should be noted that, prior to the 1981 Census, only the respondent's paternal ancestry was to be reported. If multiple ethnic origins were reported, only one origin was captured, resulting in one ethnic origin per respondent. In 1981, this restriction was removed, allowing for multiple ethnic origins. One write-in was provided on the 1981 questionnaire, in addition to the mark-in boxes. The 1986 Census questionnaire allowed respondents to write in three ethnic origins not included in the mark-in boxes. In 1991, respondents could write in up to two ethnic origins not included in the mark-in circles.

The 1991 question was changed slightly from that asked in the 1986 Census. In 1991, respondents were asked "To which ethnic or cultural group(s) did this person's ancestors belong?" The 1986 Census question asked "To which ethnic or cultural group(s) do you or did your ancestors belong?"

In 1991, the ordering of the mark-ins was altered to more accurately reflect the changing relative size of ethnic groups based on single responses in the 1986 Census.

## Experienced Labour Force

Refers to persons who, during the week prior to June 4, 1991, were employed or unemployed but who had worked since

January 1, 1990. The experienced labour force can be derived by deleting from the total labour force those unemployed persons 15 years of age and over who have never worked or who worked only prior to January 1, 1990.

### **Fertility**

Refers to the number of children ever born alive to women aged 15 years and over.

### **Full-time or Part-time Weeks Worked in 1990**

Refers to persons who worked in 1990. These persons were asked to report whether the weeks they worked in 1990 were full weeks (30 hours or more per week) of work or not. Persons with a part-time job for part of the year and a full-time job for another part of the year were to report the information for the job at which they worked the most weeks. Data are available for persons 15 years of age and over who worked in 1990, excluding institutional residents.

### **Gross Rent**

Refers to the total average monthly payments paid by tenant households to secure shelter.

### **Highest Level of Schooling**

Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or other non-university completed. University education is considered to be above other non-university. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

### **Home Language**

Refers to the language spoken most often at home by the individual at the time of the census.

### **Immigrant Population**

Refers to persons who are, or have been, landed immigrants in Canada. A landed immigrant is a person who is not a Canadian citizen by birth, but who has been granted the right to live in Canada permanently by Canadian immigration authorities. For further information on the immigrant population, see Figures 6A and 6B in the 1991 Census Dictionary (Catalogue No. 92-301E).

### **Income: Average, Median and Standard Error**

#### **Average Income**

Average income refers to the weighted mean total income of a group of income units (individuals, families or households) and is calculated from unrounded data by dividing the aggregate income of the group (e.g., males, 45-54 years of age, female lone-parent families, one-person households) by the number of units in that group.

In the case of individuals, average income is calculated only for individuals with income (positive or negative). In all other cases, both with and without income units are included in the calculation.

This concept and procedure applies to total income, employment income, wages and salaries and any other component of income.

#### **Median Income**

The median income of a specified group of income units is that amount which divides their income size distribution into two halves, i.e. the incomes of the first half of the income units are below the median, while those of the second half are above the median.

In the case of individuals, median income is calculated only for individuals with income (positive or negative). In all other cases, both with and without income units are included in the calculation.

This concept and procedure applies to total income, employment income, wages and salaries and any other component of income.

#### **Standard Error of Average Income**

Refers to the estimated standard error of average income. It is an estimate of the error introduced into these data due to the fact that they are collected only from a one in five random sample of households. When using these figures, the user can be reasonably certain that the true value of the average income (i.e. the value that would have been obtained had sampling not been used) lies within plus or minus twice the standard error and virtually certain that it lies within plus or minus three times the standard error. These estimates of standard error do not include the effects of certain types of response error or systematic or coverage errors.

### **Income: Census Family Total Income**

The total income of a census family is the sum of the total incomes of all members of that family. Similarly, the income of a family from a particular source or sources is the sum of incomes of all family members from that source or sources.

### **Income: Composition of Income**

The composition of the total income of a population group or a geographic area refers to the relative share of each income source or group of sources, expressed as a percentage of the aggregate income of that group or area.

For the profile series three groups of sources are used; employment income, which includes wages and salaries and income from farm and non-farm self employment; government transfer payments which includes all transfers or payments received from any level of government and covered as a separate income source; other income which includes investment income, retirement pensions and other money income. See "Sources of Income" for each income source description.

### Income: Employment Income

Refers to total income received by persons 15 years of age and over during 1990 as wages and salaries, net income from unincorporated non-farm business and/or professional practice and net farm self-employment income.

### Income: Household Total Income

The total income of a household is the sum of the total incomes of all members of that household.

### Income: Incidence of Low Income

The incidence of low income is the proportion or percentage of economic families or unattached individuals in a given classification below the low income cut-offs. These incidence rates are calculated from unrounded estimates of economic families and unattached individuals 15 years of age and over. Since all members of an economic family share a common status, incidence of low income is also calculated for the population in private households.

### Income: Income Status

Refers to the position of an economic family or an unattached individual 15 years of age and over in relation to Statistics Canada's low income cut-offs (LICOs).

### Income: Low Income Cut-offs (LICOs)

Measures of low income known as low income cut-offs (LICOs) were first introduced in Canada in 1968 based on 1961 Census income data and 1959 family expenditure patterns. At that time, expenditure patterns indicated that Canadian families spent

about 50% of their income on food, shelter and clothing. It was arbitrarily estimated that families spending 70% or more of their income on these basic necessities would be in "straitened" circumstances. With this assumption, low income cut-off points were set for five different sizes of families.

Subsequent to these initial cut-offs, revised low income cut-offs were established based on national family expenditure data from 1969, 1978 and 1986. These data indicated that Canadian families spent, on average, 42% in 1969, 38.5% in 1978 and 36.2% in 1986 of their income on basic necessities. By adding the original difference of 20 percentage points to the basic level of expenditure on necessities, new low income cut-offs were set at income levels differentiated by family size and degree of urbanization. Since then, these cut-offs have been updated yearly by changes in the consumer price index.

For the purposes of low income statistics, economic families and unattached individuals in the Yukon and the Northwest Territories and on the Indian reserves are excluded. The low income cut-offs were based on certain expenditure-income patterns which were not available from survey data for the entire population.

The census and the Survey of Consumer Finances differ slightly when applying the "Size of Area" classification to derive incidence of low income. Census takes into account the density of population to designate an enumeration area as urban and the total population of contiguous urban EAs determines the size of area. The survey takes complete CMAs or CAs and classifies these into size of area by total population within the CMA/CA boundaries. The overall impact of this difference is negligible.

Based on the 1986 revised cut-offs and adjusted for the changes in the Consumer Price Index, the following is the 1990 matrix of low income cut-offs:

Low Income Cut-offs for Economic Families and Unattached Individuals, 1990

Family size	Size of area of residence				
	500,000 or more	100,000 to 499,999	30,000 to 99,999	Small urban areas	Rural areas (farm and non-farm)
1	14,155	12,433	12,146	11,072	9,637
2	19,187	16,854	16,464	15,008	13,064
3	24,389	21,421	20,926	19,076	16,605
4	28,081	24,662	24,094	21,964	19,117
5	30,680	26,946	26,324	23,997	20,887
6	33,303	29,248	28,573	26,047	22,672
7 or more	35,818	31,460	30,734	28,017	24,385

### Income: Sources of Income

All persons 15 years of age or over were asked to report their total money income from the following sources during the calendar year 1990:

#### (a) Wages and Salaries

Refers to gross wages and salaries before deductions for such items as income tax, pensions, unemployment

insurance, etc. Included in this source are military pay and allowances, tips, commissions and cash bonuses, as well as all types of casual earnings in the 1990 calendar year. The value of taxable allowances and benefits provided by employers, such as free lodging and free automobile use, is excluded.

(b) Net Income from Unincorporated Non-farm Business and/or Professional Practice

Refers to net income (gross receipts minus expenses of operation such as wages, rents and depreciation) received during calendar year 1990 from the respondent's non-farm unincorporated business or professional practice. In the case of a partnership, only the respondent's share was to be reported. Also included is net income from persons baby-sitting in their own homes, operators of direct distributorships such as those selling and delivering cosmetics, as well as from free-lance activities of artists, writers, music teachers, hairdressers, dressmakers, etc.

(c) Net Farm Self-employment Income

Refers to net income (gross receipts from farm sales minus depreciation and cost of operation) received during calendar year 1990 from the operation of a farm, either on own account or in partnership. In the case of partnerships, only the respondent's share of income was to be reported. Also included are advance, supplementary or assistance payments to farmers by federal or provincial governments. However, the value of income "in kind", such as agricultural products produced and consumed on the farm, is excluded.

(d) Old Age Security Pension and Guaranteed Income Supplement

Refers to Old Age Security pensions and Guaranteed Income Supplements paid to persons 65 years of age and over, and Spouses' Allowances paid to 60- to 64-year-old spouses of Old Age Security recipients by the federal government only during the calendar year 1990. Also included are Extended Spouses' Allowances paid to 60- to 64-year-old widows/widowers.

(e) Benefits from Canada or Quebec Pension Plan

Refers to benefits received in calendar year 1990 under the Canada or Quebec Pension Plan, e.g., retirement pensions, survivors' benefits and disability pensions. Does not include lump-sum death benefits.

(f) Family Allowances

Refers to total allowances paid in calendar year 1990 by the federal and provincial governments in respect of dependent children under 18 years of age. For Quebec residents, "Allowance for children less than 6 years of age" and "Allowance for newborn children" are included. These allowances, though not collected directly from respondents, were calculated and included in the income of one of the parents.

(g) Federal Child Tax Credits

Refers to federal Child Tax Credits paid in calendar year 1990 by the federal government in respect of dependent children under 18 years of age. These credits, though not collected directly from respondents, were calculated and included in the income of one of the parents.

(h) Benefits from Unemployment Insurance

Refers to total Unemployment Insurance benefits received in calendar year 1990, before income tax deductions. It includes benefits for sickness, maternity, fishing, work sharing, retraining and retirement received under the Federal Unemployment Insurance Program.

(i) Other Income from Government Sources

Refers to all transfer payments, excluding those covered as a separate income source (Family Allowances, federal Child Tax Credits, Old Age Security pensions and Guaranteed Income Supplements, Canada or Quebec Pension Plan benefits and Unemployment Insurance benefits) received from federal, provincial or municipal programs in calendar year 1990. This source includes social assistance payments received by persons in need, such as mothers with dependent children, persons temporarily or permanently unable to work, elderly individuals, the blind and the disabled. Included are provincial income supplement payments to seniors to supplement the Old Age Security pension and Guaranteed Income Supplement and provincial payments to seniors to help offset accommodation costs. Also included are other transfer payments such as benefits under the Canadian Jobs Strategy, veterans' pensions, war veterans' allowance, pensions to widows and dependants of veterans and workers' compensation. Additionally, any amounts received in 1990 for refundable Provincial Tax Credits, Federal Sales Tax Credits and the federal Goods and Services Tax Credits are included.

(j) Dividends and Interest on Bonds, Deposits and Savings Certificates and Other Investment Income

Refers to interest received in calendar year 1990 from deposits in banks, trust companies, co-operatives, credit unions, caisses populaires, etc., as well as interest on savings certificates, bonds and debentures and all dividends from both Canadian and foreign stocks. Also included is other investment income from either Canadian or foreign sources such as net rents from real estate, mortgage and loan interest received, regular income from an estate or trust fund, and interest from insurance policies.

(k) Retirement Pensions, Superannuation and Annuities

Refers to all regular income received during calendar year 1990 as the result of having been a member of a pension plan of one or more employers. It includes payments received from all annuities, including payments from a matured Registered Retirement Savings Plan (RRSP) in the form of a life annuity, a fixed term annuity, a registered retirement income fund or an income-averaging annuity contract; pensions paid to widows or other relatives of deceased pensioners; pensions of retired civil servants, Armed Forces personnel and Royal Canadian Mounted Police (RCMP) officers; annuity payments received from the Canadian Government Annuities Fund, an insurance company, etc. Does not include lump-sum death benefits, lump-sum benefits or withdrawals from a pension plan or RRSP or refunds of overcontributions.

#### (I) Other Money Income

Refers to regular cash income received during calendar year 1990 and not reported in any of the other nine sources listed on the questionnaire, e.g., alimony, child support, periodic support from other persons not in the household, net income from roomers and boarders, income from abroad (except dividends and interest), non-refundable scholarships and bursaries, severance pay, royalties and strike pay.

#### Receipts Not Counted as Income

Gambling gains and losses, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property or personal belongings, income tax refunds, loans received, loans repaid to an individual as the lender, lump-sum settlements of insurance policies, rebates of property taxes and other taxes, and refunds of pension contributions were excluded as was all income "in kind" such as free meals, living accommodations, or agricultural products produced and consumed on the farm.

#### Total Income

"Total income" refers to the sum of amounts received during 1990 by an income recipient from the sources of income listed above.

#### Income: Total Income

Refers to the total money income received from the following sources during the calendar year 1990 by persons 15 years of age and over:

Total wages and salaries

Net income from unincorporated non-farm business and/or professional practice

Net farm self-employment income

Family Allowances

Federal Child Tax Credits

Old Age Security pension and Guaranteed Income Supplement

Benefits from Canada or Quebec Pension Plan

Benefits from Unemployment Insurance

Other income from government sources

Dividends and interest on bonds, deposits, savings certificates and other investment income

Retirement pensions, superannuation and annuities

Other money income

#### Indian Reserve

Refers to land, the legal title to which is vested in Her Majesty, that has been set apart for the use and benefit of an Indian band and that is subject to the terms of the Indian Act. Since it is generally excluded from local jurisdiction and is administered by the Federal Department of Indian and Northern Affairs Canada (INAC), it is classified as a census subdivision (CSD) by Statistics Canada.

#### Indian Settlement

Refers to places, identified by the Federal Department of Indian and Northern Affairs Canada (INAC) for statistical purposes only, where a self-contained group of at least 10 Indian people reside more or less permanently. Indian settlements are usually located on Crown lands under federal or provincial jurisdiction. They have not been set apart for the use and benefit of an Indian band as is the case with Indian reserves.

#### Industry (Based on 1980 Standard Industrial Classification)

Refers to the general nature of the business carried out in the establishment where the person worked, as indicated by the name of the employer and the kind of business, industry or service. Data are available for persons 15 years of age and over, excluding institutional residents. If the person was not employed in the week prior to enumeration, the information relates to the job of longest duration since January 1, 1990. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Census industry data based on the 1980 Standard Industrial Classification (SIC) have three levels of aggregation. There are 18 divisions (labelled A to R) which are subdivided into 75 major groups, which are, in turn, subdivided into 296 unit groups.

Direct comparisons can be made between 1991 and 1986 Census industry data based on the 1980 SIC.

Direct comparisons of 1991 and 1986 data with industry data from the 1981 and 1971 Censuses are possible, based on the 1970 SIC. For further information, refer to the definition of Labour: Industry (Based on 1970 Standard Industrial Classification) in the 1991 Census Dictionary (Catalogue No. 92-301E).

#### Inexperienced Labour Force

The inexperienced labour force consists of unemployed persons 15 years of age and over who have never worked or who worked only prior to January 1, 1990.

#### Institutional Resident

Refers to a resident of an "institutional" collective dwelling, other than staff members and their families.

"institutional" collective dwellings are children's group homes and orphanages, nursing homes, chronic care hospitals, residences for senior citizens, hospitals, psychiatric institutions, treatment centres and institutions for the physically handicapped, correctional and penal institutions, young offenders' facilities and jails.

### Knowledge of Non-official Languages

Refers to the language or languages, other than English or French, in which the respondent can conduct a conversation.

The non-official language data are based on the respondent assessment of his or her ability to speak non-official languages.

### Knowledge of Official Languages

Refers to the ability to conduct a conversation in English only, in French only, in both English and French or in none of the official languages of Canada.

The official language data are based on respondent assessment of his or her ability to speak the two official languages.

### Labour Force Activity

Refers to the labour market activity of the working age population who, in the week prior to June 4, 1991, were **employed** or **unemployed**. The remainder of the working age population is classified as **not in labour force**. Data are available for persons 15 years of age and over, excluding institutional residents.

### Landed Immigrant Status

Refers to persons who are not Canadian citizens by birth, but who have been granted the right to live in Canada permanently by Canadian immigration authorities.

The landed immigrant status question, in conjunction with the citizenship question, permits Census data users to identify the non-immigrant population, the immigrant population and non-permanent residents. For more information on these populations, refer to Figures 6A and 6B in the 1991 Census Dictionary (Catalogue No. 92-301E).

### Marital Status (Legal)

Refers to the conjugal status of a person.

#### Legally married (and not separated)

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained.

#### Legally married and separated

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce.

#### Divorced

Persons who have obtained a legal divorce and who have not remarried.

### Widowed

Persons who have lost their spouse through death and who have not remarried.

### Never married (single)

Persons who have never married (including all persons less than 15 years of age) and persons whose marriage has been annulled and who have not remarried.

### Mobility Status - Place of Residence 1 Year Ago

Refers to the relationship between a person's usual place of residence on Census Day and his or her usual place of residence one year earlier. A person is classified as a **non-mover** if no difference exists; otherwise, a person is classed as a **mover** and this categorization is called Mobility Status (1 Year Ago). Within the category **movers**, a further distinction is made between **intraprovincial movers**, **interprovincial migrants** and **external migrants**.

**Non-movers** are persons who, on Census Day, were living at the same address which they occupied one year earlier.

**Movers** are persons who, on Census Day, were living at a different address than the one at which they resided one year earlier.

**Intraprovincial movers** are movers who, on Census Day, were living at a different address but in the same province/territory that they occupied one year earlier.

**Interprovincial migrants** are movers who, on Census Day, were living in a different province/territory one year earlier.

**External migrants** are movers who, on Census Day, were living outside Canada one year earlier.

### Mobility Status - Place of Residence 5 Years Ago

Refers to the relationship between a person's usual place of residence on Census Day and his or her usual place of residence five years earlier. A person is classified as a **non-mover** if no difference exists; otherwise, a person is classed as a **mover** and this categorization is called Mobility Status (5 Years Ago). Within the category **movers**, a further distinction is made between **non-migrants** and **migrants**; this difference is called migration status.

**Non-movers** are persons who, on Census Day, were living at the same address which they occupied five years earlier.

**Movers** are persons who, on Census Day, were living at a different address than the one at which they resided five years earlier.

**Non-migrants** are movers who, on Census Day, were living at a different address but in the same census subdivision (CSD) that they occupied five years earlier.

**Migrants** are movers who, on Census Day, were residing in a different CSD five years earlier (**internal migrants**) or who were living outside Canada five years earlier (**external migrants**). **Internal migrants** are further divided into two categories: **intraprovincial migrants**, who moved to a different CSD within the same province, and **interprovincial migrants**, who moved to another province.

**External migrants** are movers who, on Census Day, were living outside Canada five years earlier.

## Non-immigrant Population

Refers to persons who are Canadian citizens by birth. For further information on the non-immigrant population, see Figures 6A and 6B in the 1991 Census Dictionary (Catalogue No. 92-301E).

## Non-permanent Residents

Refers to persons who hold a student authorization, employment authorization, Minister's permit or who are refugee claimants. For further information on this population, refer to the "Special Notes" section and to Figures 6A and 6B in the 1991 Census Dictionary (Catalogue No. 92-301E).

## Not in the Labour Force

Refers to those persons who, in the week prior to enumeration, were unwilling or unable to offer or supply their labour services under conditions existing in the labour market. It includes persons who looked for work during the last four weeks but who were not available to start work in the reference week, as well as persons who did not work, did not have a new job to start in four weeks or less, were not on temporary lay-off or did not look for work in the four weeks prior to enumeration. Data are available for persons 15 years of age and over, excluding institutional residents.

## Occupation (Based on 1980 Standard Occupational Classification)

Refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the most important duties in their job. Data are available for persons 15 years of age and over, excluding institutional residents. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1990. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Occupation data are based on the 1980 classification structure which is composed of three levels of aggregation. There are 22 major groups which are subdivided into 80 minor groups. These, in turn, contain a total of 514 unit groups.

The 1981 and 1986 Censuses also used the 1980 Standard Occupational Classification to classify occupation data; therefore, direct comparisons with 1991 data are possible. For comparisons with 1971 data, adjustments must be made to the labour force universe and only occupation data classified to the 1971 Occupational Classification Manual can be used. For further information, refer to the definition of Labour: Occupation (Based on 1971 Occupational Classification Manual) in the 1991 Census Dictionary (Catalogue No. 92-301E).

## Occupied Private Dwelling

Refers to a private dwelling in which a person or group of persons are permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day. These data, however, exclude private dwellings occupied solely by foreign and/or temporary residents.

## Owner's Major Payments

Refers to the total average monthly payments made by owner households to secure shelter.

## Owner's Major Payments or Gross Rent as a Percentage of Household Income

Refers to the proportion of average monthly 1990 total household income which is spent on owner's major payments (in the case of owner-occupied dwellings) or on gross rent (in the case of tenant-occupied dwellings). This concept is illustrated below:

(a) Owner-occupied non-farm dwellings:

$$\frac{\text{Owner's major payments}}{(\text{1990 total annual household income}) / 12} \times 100 = \text{ } \%$$

(b) Tenant-occupied non-farm dwellings:

$$\frac{\text{Gross rent}}{(\text{1990 total annual household income}) / 12} \times 100 = \text{ } \%$$

## Participation Rate

Refers to the total labour force (in reference week) expressed as a percentage of the population 15 years of age and over, excluding institutional residents. The participation rate for a particular group (age, sex, marital status, geographic area, etc.) is the labour force in that group expressed as a percentage of the population for that group.

## Period of Construction

Refers to the period in time during which the building or dwelling was originally constructed.

## Period of Immigration

Refers to groupings of years derived from the year of immigration question.

## Place of Birth

Refers to specific provinces or territories if born in Canada, or to specific countries if born outside Canada.

## Place of Work

Refers to the usual place of work of non-institutional residents 15 years of age and over who have worked since January 1, 1990. The variables usually relate to the individual's job in the week prior to enumeration. However, if the person had not worked in that week but had worked since January 1, 1990, the information relates to the job held longest during that period.

Respondents were to check the "Worked at home", "Worked outside Canada" or "Worked at address specified below" box. Explanations follow.

**Worked at home** - Includes those persons whose location of employment is in the same building as their place of residence and those persons living and working on the same farm.

**Worked outside Canada** - Includes diplomats, Armed Forces personnel and others enumerated abroad, recent immigrants not currently employed whose job of longest duration since January 1, 1990 was outside Canada, and other persons who indicated that they worked outside Canada.

**Worked at the address specified below** - This response was to be checked off by persons whose place of work did not fall in either the "Worked at home" or "Worked outside Canada" categories. In addition, the full address of the place of work was to be reported. If the full address was not known, the name of the building or street intersection could be substituted. Persons who did not work in one area but who reported regularly to a headquarters were to give the address of the local headquarters or depot. Persons with no fixed or usual place of work were asked to write in "No usual place".

## Presence of Children

The Presence of Children variable classifies females 15 years and over in private households into those with children at home and those with no children at home. Females with children at home are then further classified on the basis of the age groups of their children.

The term "children" refers to all blood, step-, or adopted sons and daughters, who have never married, regardless of age, in census families (in private households), who are living in the same dwelling as their parent(s). Sons and daughters who are currently or were previously married, or who are living common-law, are not considered to be members of their parent(s)' census family, even if they are living in the same dwelling.

## Private Dwelling

Refers to a separate set of living quarters with a private entrance either from outside or from a common hall, lobby, vestibule or stairway inside the building. The entrance to the dwelling must be one which can be used without passing through the living quarters of someone else. The dwelling must meet the three conditions necessary for year-round use:

- (1) a source of heat or power (as evidenced by chimneys, power lines, oil or gas pipes or meters, generators, woodpiles, electric lights, solar heating panels, etc.);
- (2) access to a source of drinking water throughout the year (as evidenced by faucets, drain pipes, wells, water pumps, etc.);
- (3) an enclosed space that provides shelter from the elements (as evidenced by complete and enclosed walls, by a roof, and by doors and windows that provide protection from wind, rain and snow).

## Private Household

Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada.

## Province

Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified.

## Religion

Refers to specific religious denominations, groups or bodies as well as sects, cults, or other religiously defined communities or systems of belief.

## Rooms

Refers to the number of rooms in a dwelling. A room is an enclosed area within a dwelling which is finished and suitable for year-round living.

## School Attendance

Refers to either full-time or part-time (day or evening) attendance at school, college or university during the nine-month period between September 1990 and June 4, 1991. Attendance is counted only for courses which could be used as credits towards a certificate, diploma or degree.

## Sex

Refers to the gender of the respondent.

## Tenure

Refers to whether some member of the household owns or rents the dwelling, or whether the dwelling is band housing (on an Indian reserve or settlement).

A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).

A dwelling is classified as "rented" even if it is provided without cash rent or at a reduced rent or if the dwelling is part of a co-operative. For census purposes, in a co-operative all members jointly own the co-operative and occupy their dwelling units under a lease agreement.

For historical and statutory reasons, shelter occupancy on reserves does not lend itself to the usual classification by standard tenure categories. Therefore, a special category, **band housing**, has been created for 1991 Census products.

## Territory

Refers to two major political divisions of Canada, namely Yukon Territory and Northwest Territories. From a statistical point of view, these territories are equivalent to provinces, i.e. a basic unit for which data are tabulated and cross-classified.

## Total Labour Force

Refers to persons who were either employed or unemployed during the week prior to enumeration (June 4, 1991). Data are available for persons 15 years of age and over, excluding institutional residents.

## Unemployed

Refers to persons who, during the week prior to enumeration (June 4, 1991):

- (a) were without work, actively looked for work in the past four weeks and were available for work; or
- (b) were on lay-off and expected to return to their job and were available for work; or
- (c) had definite arrangements to start a new job in four weeks or less and were available for work.

Data are available for persons 15 years of age and over, excluding institutional residents.

## Unemployment Rate

Refers to the unemployed labour force expressed as a percentage of the total labour force (in reference week). The unemployment rate for a particular group (age, sex, marital status, geographic area, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group. Data are available for persons 15 years of age and over, excluding institutional residents.

## Value of Dwelling

Refers to the dollar amount expected by the owner if the dwelling were to be sold.

## Work Activity in 1990

Refers to the number of weeks in which a person worked in 1990 and whether these weeks worked were full-time or part-time. Individuals who worked 49 to 52 weeks, mostly full time, are classified as full-year, full-time workers.

## Data Quality

### General

The 1991 Census was a large and complex undertaking and, while considerable effort was taken to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. Users of census data should be aware such error exists, and have some appreciation of its main components, so that they can assess the usefulness of census data for their purposes and the risks involved in basing conclusions or decisions on these data.

Errors can arise at virtually every stage of the census process from the preparation of materials, through the listing of dwellings and data collection to processing. Some errors occur more or less at random, and when the individual responses are aggregated for a sufficiently large group, such errors tend to cancel out. For errors of this nature, the larger the group, the more accurate the corresponding estimate. It is for this reason that users are advised to be cautious when using small estimates. There are some errors, however, which might occur more systematically, and which result in "biased" estimates. Because the bias from such errors is persistent no matter how large the group for which responses are aggregated, and because bias is particularly difficult to measure, systematic errors are a more serious problem for most data users than the random errors referred to previously.

For census data in general, the principal types of error are as follows:

- **coverage errors**, which occur when dwellings and/or individuals are missed, incorrectly included or double counted;
- **non-response errors**, which result when responses cannot be obtained from a small number of households and/or individuals, because of extended absence or some other reason;
- **response errors**, which occur when the respondent, or sometimes the Census Representative, misunderstands a census question, and records an incorrect response;
- **processing errors**, which can occur at various steps including: **coding**, when "write-in" responses are transformed into numerical codes; **data capture**, when responses are transferred from the census questionnaire to computer tapes by key-entry operators; and **imputation** when a "valid", but not necessarily correct, response is inserted into a record by the computer to replace missing or "invalid" data ("valid" and "invalid" referring to whether or not the response is consistent with other information on the record);
